Print Method 2:	.
Print Location:	.
Imprint Color(s):	.
Print Method 3:	.
Print Location:	.
Imprint color(s):	.

Important Note: The PMS colors shown on proof may not be accurately represented by your monitor. Further, all metallic inks will NOT show up as metallic on screen. The reliable reference for the PMS colors is the actual Pantone Color Book, not the monitor. In 4-color process printing exact color match is not guaranteed. Laser engraving appears on actual item as tone on tone (as the laser engraving uses the laser to break the surface), on clear acrylic it appears white frost, on proof laser engraving is most often shown in gray color.
